

Professor of Landscape Architecture at the Swedish University of Agricultural Sciences in Alnarp/ Malmö, and a specialist of contemporary European landscape architecture practice and theory. She studied architecture and urbanism in Paris, Marseille and Stuttgart, science journalism in Berlin, and landscape architecture at the University of Copenhagen, where she received her doctoral degree for a study of site-specific design approaches to transform port areas.

As the current director of the research platform SLU Urban Futures, she encourages transdisciplinary research on urban sustainability to respond to current global challenges from a landscape perspective. Her research and teaching focuses on contemporary design, on critical urbanities in the Global North and South, on site-specific transformation of post-industrial areas, and on transdisciplinary practices. Her professional publications encompass the triennial book series Landscape Architecture Europe and 'scape the international magazine for landscape architecture and urbanism, produced by Blauwdruk Publishers in the Netherlands.
