

Geographer, Member of the Scientific Committee of RETE. Formerly post-doctoral researcher in South Korea (KRIHS) and the Netherlands (EUR), he is Senior Researcher at the French National Centre for Scientific Research (CNRS) and member of the UMR 7235 EconomiX laboratory in Paris-Nanterre. His research activity is focused on port cities and maritime transport with particular attention to network analysis, environment and health issues, industrial relatedness, cartography, and Europe-Asia comparisons. He had recently been working as expert with the World Health Organisation (WHO), the World Bank, and the Korea Maritime Institute (KMI). He previously led a European Research Council (ERC) starting grant project about the evolution of the global maritime network since the 19<sup>th</sup> century, which is prolonged by numerous works on urban gravity, traffic specialization, technological change, port connectivity, resilience, and vulnerability.
